

# First AW139 Helicopter Assembled in Thailand

Newsletter  
Q2  
June 19, 2024

Thai Aviation Services (TAS) has achieved a significant milestone by successfully assembling its first AW139 helicopter in Thailand. The AW139, classified under aircraft group 1 as a Complex Motor-Powered Aircraft (CMPA), highlights TAS's dedication to enhancing operational capabilities and expanding its service offerings.

## Successful Completion of the Full Assembly of the AW139.

Repair Station Certificate, CAAT AMO.0459

TAS proudly announces the latest addition to its fleet, the AW139 helicopter. This significant milestone underscores our leadership in offshore operations, with the AW139 being fully assembled by Thai Aircraft Engineering experts. The successful completion of the full assembly of the AW139 not only marks a technological achievement but also highlights the expertise and dedication of our repair station team.:

*The journey of the AW139 helicopter from Leonardo in Italy.*

Our team's dedication ensured a smooth and efficient assembly process, resulting in an aircraft ready to serve offshore missions. The entire process, from Italy to Thailand, was a testament to the precision and coordination of our skilled workforce.

## Certification and Regulatory Compliance

Ensuring that the AW139 meets all regulatory standards is a top priority for TAS.

All aircraft certificates have been inspected and issued by the relevant authorities. Additionally, all manuals and documents related to the AW139 have been approved by the CAAT.

These certifications and approved documents underscore TAS's commitment to maintaining the highest standards of safety, reliability, and regulatory compliance.

Our comprehensive documentation ensures that every aspect of the AW139's operation and maintenance is covered, providing peace of mind to our clients.

## Continues to comply,

Emphasis on Aircraft Conformity and Internal Audits.

TAS sees the importance of aircraft conformity with training systems and internal audits to ensure ongoing compliance and operational excellence.

Key initiatives include:

### Focus on conformity and continuous improvement

Aircraft Conformity:

Regular checks and updates to ensure all aircraft adhere to the latest regulatory and operational standards.

Training System:

Comprehensive training programs for pilots, crew, engineering, and maintenance staff to ensure proficiency and safety.

Internal Audits:

To identify and address any discrepancies, ensuring continuous improvement in all processes.

Our vision for the future includes not only expanding our capabilities but also pushing the boundaries of innovation in aviation services.
